It is advised that motorists proceed with **EXTREME CAUTION** at all times while travelling on roads, especially during wet weather. Not all roads may have been inspected at the time this condition report was released and conditions are constantly changing. Caution is urged if traversing water across road as road surfaces may be damaged, submerged matter may not be clearly visible and underlying currents can be swift. Road shoulders of sealed roads generally become soft during heavy rain events and movement off the bitumen seal is discouraged. On gravel roads when roads are wet stay on the constructed road, do not drive around ponded water that may be on the road.
