PUBLIC NOTICE

Bedourie Swimming Pool – Maintenance Update

Diamantina Shire Council wishes to provide the community with an update on ongoing maintenance issues at the Bedourie Swimming Pool.

Council is currently managing cracks in the pool shell and undertaking temporary repairs to ensure the pool can remain open and accessible to the community while longer-term solutions are investigated.

Water Quality and Discolouration

Council is aware of concerns regarding discolouration in the pool. While this may resemble algae or slime, the discolouration is caused by a build-up of minerals naturally present in the artesian bore water.

The pool is fitted with an automatic chemical dosing system to maintain appropriate water balance. Council also conducts water quality testing twice daily, in the morning and afternoon, to ensure the water is safe for swimming.

Ongoing Repairs and Maintenance

A specialist pool company attended the facility on 18 November 2026 to assess the condition of the pool and will provide Council with recommendations for a longer-term solution.

Additional maintenance requirements, including repairs to loose brickwork, have also been identified and scheduled.

Council remains committed to maintaining a safe and accessible swimming facility for the Bedourie community.

Council apologises for any inconvenience caused and appreciates the community's patience and understanding while these issues are addressed.
